

PIYUSH PRATAP SINGH

Trainee — RPA & AI | Python Automation | AI/ML & GenAI | REST APIs & System Integration | NLP & LLM | Power BI · SQL
piyushpratapsingh739@gmail.com • +91-6204386595 • Open to Pune (SP Infocity) ✓ • Hybrid ✓ • [LinkedIn](#) • Immediate Joiner ✓

PROFESSIONAL SUMMARY

Highly motivated B.Tech graduate (AI & ML, CGPA: 8.0/10, 2026) passionate about **Robotic Process Automation (RPA)**, **Artificial Intelligence**, **Machine Learning**, **NLP**, and **Intelligent Automation**. Hands-on production experience in **Python-based process automation**, **AI/ML model development and deployment**, **REST API integration**, **GenAI (RAG systems, LLMs, BERT)**, and **data analytics** — with a **live production AI automation system** deployed and maintained independently. Strong foundation in **RPA concepts and automation workflow logic** through Python scripting and process optimisation work — achieving **~40% manual effort reduction** on real business workflows. Proficient in **SQL/MySQL**, **Power BI (Microsoft Certified)**, **Tableau (Certified)**, **Git/GitHub**, and actively building skills in **UiPath** and **Power Automate (Microsoft Power Platform)**. Eager to contribute to **Koncranes' Automation Centre of Excellence (CoE)** — bringing a **data-driven, quick-learning, independently motivated mindset** to real-world enterprise automation and AI challenges.

TECHNICAL SKILLS

RPA & Process Automation	Python automation scripting — end-to-end workflow automation (data collection, transformation, validation, reporting); Power Automate (learning via Microsoft Learn); UiPath (fundamentals — learning); RPA concepts: trigger-based workflows, exception handling, scheduled execution, process optimisation; ~40% manual effort reduction achieved on real workflows
AI / ML / NLP / GenAI	Production GenAI: BERT embeddings, FAISS vector search, RAG (Retrieval-Augmented Generation), LLM integration; ML: Scikit-Learn (classification, clustering, regression), PyTorch (YOLOv8 — real-time CV); NLP: tokenisation, semantic similarity, sentence embeddings, text classification; Pandas, NumPy — data preparation for ML projects
Python (Primary Language)	Advanced Python — OOP, automation pipelines, REST API development (Flask), data processing (Pandas, NumPy), ML model integration, scripting for system automation; clean, well-documented code; Git/GitHub version control; Linux CLI — production environment management
REST APIs & System Integration	Production REST API design and deployment (Flask) — request routing, authentication, JSON data exchange, error handling; API testing (Postman); SQL/MySQL integration; cloud-hosted API services; system integration across multiple data sources and platforms
SQL & Database Fundamentals	MySQL, SQLite — table design, joins, aggregations, subqueries, CTEs, data validation, deduplication; data preparation and extraction for ML and automation workflows; database maintenance and integration with automation pipelines
AI Tools & Preferred Stack	Power BI (Microsoft Certified) — automation dashboards, KPI tracking; Tableau (Certified) — trend analysis; Git/GitHub (version control, DevOps basics); Power Automate (learning); Azure DevOps concepts (learning); MS Power Platform awareness
Business Process Analysis	Identifying automation opportunities in manual workflows, process mapping, requirement documentation, gap analysis, ROI estimation for automation candidates — applied to real business data workflows resulting in measurable efficiency gains
Documentation & Teamwork	Technical and process documentation, automation workflow design docs, SOP creation, troubleshooting runbooks; cross-functional team collaboration (Fortune 500 partner); independent ownership; fast learner in emerging technologies

INTERNSHIP EXPERIENCE

AI Automation & Data Science Intern — Automation CoE Equivalent

Swizosoft (OPC) Private Limited | Bengaluru | Full-Time

Feb 2026 – May 2026

Domain: RPA-Equivalent Automation · AI/ML · API Integration · GenAI

- **Process Automation Design & Development (RPA-Equivalent):** Analysed manual business data workflows, identified automation opportunities, designed automation logic, and built Python-based automation solutions — covering data extraction, transformation, validation, and report generation. Applied core RPA workflow patterns (trigger → process → exception handle → output) achieving ~40% reduction in manual effort; directly equivalent to UiPath/Power Automate bot development at the logic level.
- **AI-Powered Automation Solution — Production Deployment:** Designed, developed, tested, deployed, and maintained a live production AI automation system (GenAI RAG chatbot — BERT, FAISS, Python, Flask, REST API, SQLite, Render Cloud) — covered the full automation lifecycle from business process analysis through deployment and ongoing support. Intelligent document processing, semantic matching, and automated response generation — all core IDP/AI automation capabilities.
- **REST API & System Integration:** Built and integrated production REST APIs connecting multiple system components (NLP model, database, web interface) — managed data exchange, authentication, error handling, and system integration across platforms using Python and Flask; directly applicable to enterprise automation integrations with SAP, ERP, and business applications.

- **Data Preparation & ML Model Support:** Performed data preparation and feature engineering for ML model development — cleaned, validated, transformed, and structured datasets for model training and inference. Supported AI/ML initiatives through Python scripting, SQL data extraction, and automated pipeline management.
- **Technical & Process Documentation:** Created comprehensive technical documentation covering automation workflow design, system architecture, API specifications, data transformation logic, and troubleshooting runbooks — followed organisational best practices for documentation standards; directly supports the CoE documentation requirement.

AI & Data Analytics Intern — Intelligent Automation Support
AICTE × Shell India (Edunet Foundation) | Remote | Fortune 500 Partner

Jul 2025 – Aug 2025
Domain: Process Automation · ML Analytics
· Enterprise Data Integration

- **Business Process Analysis & Automation Opportunity Identification:** Analysed data processing workflows for a Fortune 500 partner — identified manual, repetitive steps suitable for automation, documented process requirements and scope, and implemented Python automation solutions reducing manual workload. Demonstrates the business process analysis and automation opportunity identification core to the CoE Trainee role.
- **AI/ML & Data Science Initiatives Support:** Applied supervised and unsupervised ML techniques (K-Means clustering, regression, statistical modelling) across large-scale real-world energy datasets — performed data preparation, feature engineering, model evaluation, and results documentation; directly supports AI/ML and Data Science initiatives as required in this role.
- **Cross-Functional & Global Team Collaboration:** Collaborated with an international cross-functional team (Fortune 500 partner — Shell India) — worked across functions, contributed to automation planning discussions, delivered technical outputs independently, and maintained professional documentation throughout; demonstrates globally-exposed, collaborative working style aligned to Konecranes' CoE culture.

AUTOMATION & AI PROJECTS PORTFOLIO

Production GenAI Intelligent Automation System — Python, BERT, FAISS, Flask,²⁰²⁶ | *Live & Maintained*
REST API, Cloud (Live)

- **IDP & intelligent automation:** Built and deployed a live Intelligent Document Processing (IDP) and AI automation system — BERT semantic embeddings for document understanding, FAISS vector search for intelligent matching, automated response generation pipeline, REST API for system integration, and cloud deployment for production availability. Covers Konecranes CoE priorities: chatbots ✓, document processing ✓, predictive matching ✓, API integration ✓.
- **Full automation lifecycle:** Independently managed the complete automation development lifecycle — business need identification → workflow design → development → testing → deployment → maintenance and troubleshooting. Demonstrates the end-to-end CoE Trainee capability required.

Python RPA-Equivalent Automation Pipeline — Python, Pandas, MySQL, REST API,^{Jan 2026}
Power BI

- **Automation workflow — RPA logic applied:** Built a multi-stage automated workflow: data trigger (scheduled run) → extraction (MySQL + REST API) → transformation & validation (Python/Pandas) → exception handling (anomaly detection + alerts) → output generation (Power BI dashboard + Excel report). This is the exact RPA workflow pattern used in UiPath and Power Automate — implemented in Python. Achieved 100% accuracy across 500+ records with ~40% cycle time reduction.

Real-Time Computer Vision AI Pipeline — PyTorch, YOLOv8, Python ²⁰²⁵

- **AI/ML production model — real-time inference:** Built a real-time object detection pipeline using PyTorch and YOLOv8 — applied deep learning model integration, inference optimisation, and real-time data stream processing. Demonstrates ML model development and deployment capability directly relevant to predictive model support in the CoE.

UiPath / Power Automate Learning Lab — Automation CoE Self-Development ²⁰²⁶ | *Active*

- **Actively closing the RPA tool gap:** Enrolled in UiPath Academy (free) and Microsoft Power Automate learning path — building hands-on automation workflows including data scraping, Excel automation, email automation, and API-triggered flows. Lab work documented on GitHub as skills build.

EDUCATION

B.Tech — Artificial Intelligence & Machine Learning
Acharya Institute of Technology, Bengaluru | VTU Affiliated

2022 – 2026
CGPA: 8.0 / 10.0 | Graduated 2026

Relevant Coursework: *Machine Learning, Deep Learning, NLP & GenAI, Python Programming, Database Management (SQL), Data Structures & Algorithms, Software Engineering, Cloud Computing, Statistics & Probability, Computer Networks, Business Intelligence*

Higher Secondary — Holy Cross School, Hazaribag | 78% (2022) • Secondary — Radha Govind Sr. Sec. Public School | 83% (2020)

CERTIFICATIONS

UiPath RPA Developer Foundation — UiPath Academy (In Progress)

Machine Learning Specialisation Coursera — [Verified](#)

Introduction to Modern AI Cisco — [Credly Verified Badge](#)

Microsoft Power BI Data Analyst — [Certified](#)

Tableau Desktop Specialist — [Certified](#)

Python Programming & Data Structures - [Certified](#)

BCG GenAI Job Simulation Forage — [Certified](#)

Data Analytics Job Simulation Forage — [Certified](#)

LeetCode SQL 50 Advanced SQL — In Process

ADDITIONAL

Location: Open to Pune — SP Infocity ✓ | Hybrid ✓ | Immediate joiner ✓ **Experience:** 0–1 year ✓ | Fresher with internships & production projects ✓ **RPA Tools:** UiPath Academy (enrolled) ✓ | Power Automate (Microsoft Learn) ✓ | Python automation (production) ✓ **Deadline:** Available to join before 10 July 2026 ✓ **Languages:** English (B2+ fluent), Hindi (native) **GitHub:** All automation & AI projects — github.com/1616piyu
